HOW NOT TO DO IT. During the last two days, the community has been, strange to say, startled by the ne-tion of our Legislature. It is not often that public attention is very seriously engrossed by the antics of our politicians, but we must confess that the killing of the two importan measures of the Session-the Incorporation and School Bills-has created quite a lively sensation On the score of ennut, we really cannot blame the President of the one assemblage, and the Speaker of the other, in thus breaking the dreamy spell which seemed to have been thrown around the Houses of Legislature. Eight months of a monotonou existence had passed-a dreary season of mental paralysis—and it was certainly time that some little spirit should be thrown into the Legislative preceedings. People had begun to lorget that there were honorable gentiemen meeting periodically across James Bay with the avowed purpose of making law and assisting in opening up the country What with speculation sublimated by the argentiferous and auriferous excitement of Goldstream-with copper and coal developments sufficient to throw the Pacific const into a perfect furore-with well-meaning gentles men for the first time plunged into the dan-gerous vortex of that patronage which comes from a sort of irresponsible expenditure of the public money-with, in fact, a host of inter se excitements keeping the minds of our population in a state of continued tension, it was not to be expected that the hum-drun performances of the members of Legislature would be invested with much importance

ciative populace, and denies them clean streets and education for their children. There is something grand in this expiring effort of the two Houses. It is the "charge Chester, charge," of the dying Marmion. "Down with Municipal Government," cries one. " Death to Education," shouts the other, and, presto, the Mayor is garotted and the schoolmaster is put in the stocks. The result is highly gratifying for eight months work; eight mouths did we say? rather five years. Five long laborious years. It is the same, sad, old story. The curtain lifts and the play commences. We watch the performers with a kind of mechanical attention. Scene after scene flits by, " uct " after " act " come up, and at last we are warned that the thing is over by the gradual extinction of the lights We struggle towards the pure atmosphere again, and, for the first time, truly realize mere phantasy gotten up for the occasion If we turn back we shall probably see Iag and Othello, whom we witnessel a little sham-pre arranged and rehearsed. Iago wa never intended to be slain- the Incorporation was never intended to be passe. Othello's dagger was never meant to pene-trate even his Moorish garb—the School Bil was never drawn up for Legislative sanct on The play has been performed-some of the actors have been allowed to take the good

lineate the bad; but both good and bad were The Incorporation Bill as it went up the Council was one mass of incongruities and deserved its fate. But why was it made a thing of such "shreds and patches" at all ? Why were the members not content with the Legislative wisdom of other countries, without endeavoring to improve upon it? Did they that a predilection for "rock and swamp" was indicative of "heaven-born" statesmanship, and that the ability of Engstatesmanship, and that the ability of England, Canada or Australia was something that might be moulded into practical shape, were it only placed in their august hands? From the tirst faint efforts, however, of grant ing the people of Victoria municipal privileges, to the present time, it was unmistakably evident that the Legislature of the Colony was determined that no other law-making body should exist upon the Island but themselves. Hence the bungling from first to last With the school system, it is also clear tha no free system of education was ever intended to become the law of the land. gressive tendenci s on the other were quite sufficient to kill this measure at any time port-the inharmonious and disjointed mar ner in which the bill was framed, with the innovation of a poll-tax-all seem as if the ultimate end was clearly perceived and calculated upon by the Committee. Were anything wanted to complete the case agains but one out of the whole of the members of the Committee was present yesterday. In our remarks the other day we pointed out the principal drawback of the measure, but that could have been remedied by proper action in the committee. On the whole, the present the city at a time when they are mos wanted, and has disgraced the colony by shutting its face determinedly against the education of our youth. Its life has been wicked enough to be cut off in the most summary manner, and we look, so soon as proper action is taken on the Crown Lands Committee, to see a dissolution that will send the members back again to their private occupations.

CHINESE INDUSTRY.—I saw a man who had a plot of ground, in which he was going to plant out rome cabbages. He knew there were beetles and other insects in the ground which would eat them, so, when it was all wady, he put bits of cabbage leaf, about two et apart, all over the plot, placing a stone to each to keep it from being blown away. To left them for a line, and then visited them stringeryals, finding insects at work on them t intervals, finding insects at work on them ach time. These he killed, removing careally the remains for fear of their scaring way the brethren. At last, when he could carch no more, he planted out his cabbages. TO FARMERS:

WE, WITH GREAT CONFIDENCE, offer the Buckeye Machine for this reas n: Knewing it to be superior to any Mower for sale, and that it will sustain the reputation it has made for the past three years in surpsising any other Mower in the following respects:

Being better Mede; much Stronger and more Durable; will Run Lighter; Cut much closer with greater ease to the team, and no side draught, We can bring twenty Farmers to say the UUCK-EYE is SUPERICIR to any Mower, to once who can be found prejudieed against it.

The Buckeve Mowers are of two sizes, cutting 4 feet, and 4 feet 8 inches.

The "Buckeye" as a Reaper. The important advantages which belong to the BUCKEYE as a mower are retained in the Reaper, and can be used either as a Mower or Reaver by attaching the Platform and Beel.

Though importing largely of them, we have been unable, for two years, to supply the demay d.

They are better adapted to the wants of California Farmers than any combined Machine for sale. It will adapt itself to every surface of ground, will run lighter and deliver its grain casier and better than any other Reaper. The Re-per's seat is directly over the axle of the Machine, is stead of being on the Platform, where it adds greatly to the draught.

WE ARE SOLE AGENTS

In San Francisco and Marysville for the Haines "Illinois" Header. This is the only Header, which, during the past six years has atood the test and given satisfaction; all others which have been tried have proved fail-ures, and have been withdrawn from the Market as unsaleable.
